

Timing Mode: **DELAY AFTER SENSE**

Category: **CURRENT SENSOR**

Series: **HCS**

**CURRENT SENSOR, SOLID STATE OUTPUT, 1 AMP** PELCO COMPONENT TECHNOLOGIES • 855 227 3526

### HCS Current Sensor

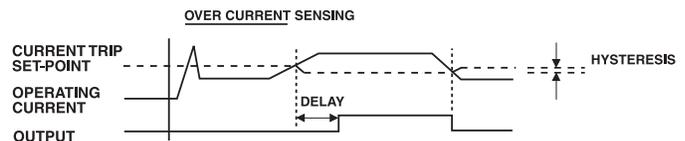

The HCS is a high-range current sensor with sense capabilities from 8 to 60 amps AC. The set point is either factory fixed or adjustable.

HCS is completely self-powered with solid state DC switching to interface with a Programmable Logic Control (PLC) or control relays.

### Sense Mode

When the sensed current reaches the setpoint the output turns on.

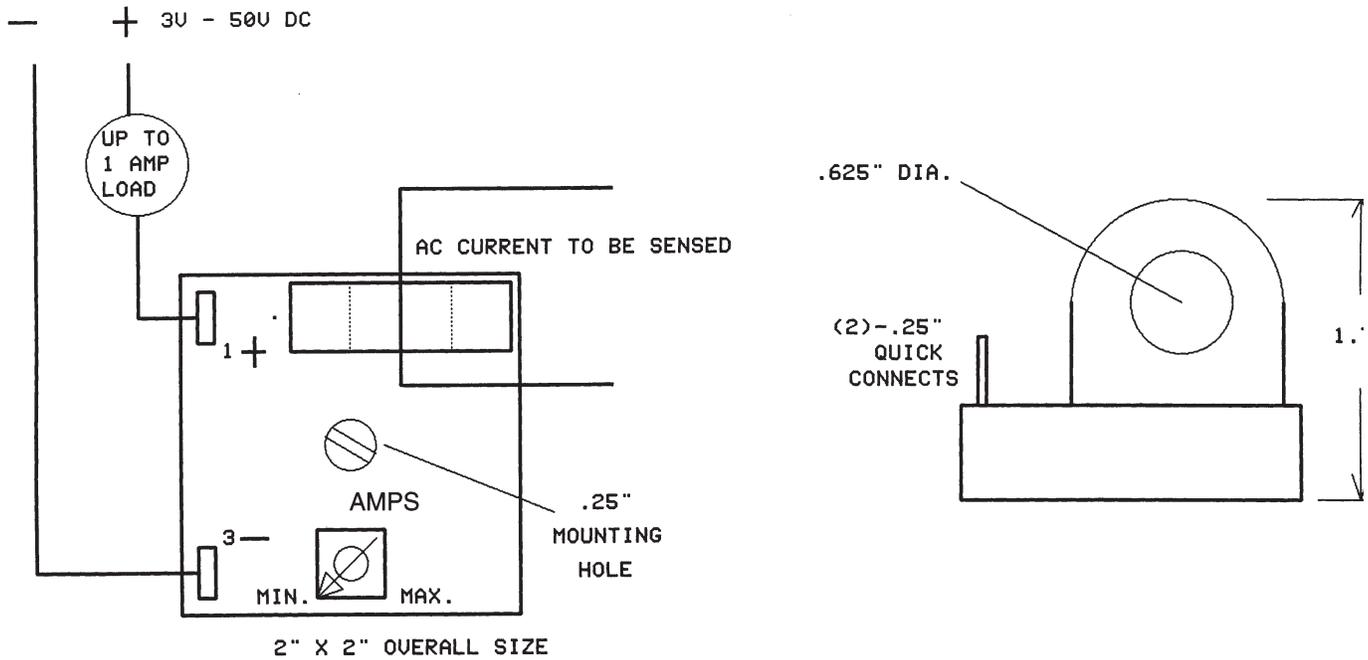

When the current goes below setpoint the output turns off.

## FEATURES

- Toroidal sensing provides total isolation between sensed current and output circuit
- Setpoint adjusted by on board potentiometer or factory-fixed, up to 60 amps
- Self powered, no external supply voltage needed
- Compact 2" x 2" package with single screw mounting
- Totally encapsulated for protection from harsh environments
- Direct connection to PLC input
- 100% Operational testing before shipping
- Designed and manufactured in the U.S.A.
-  RoHS compliant

## BASIC WIRING AND DIMENSIONS

072816

## SPECIFICATIONS

**Input Voltage:** 3-50VDC

**Hysteresis:**  $\pm 5\%$  of set point typical

**Load:** Up to 1 Amp—solid state switching

**Adjustability:** Linear min to max with trimpot option

**Sensor:** Toroid—Through hole wiring

**Stability:**  $\pm 2\%$  over temperature

**Current Range:** 8 Amps minimum to 60 Amps maximum

**Temperature Ranges:** Storage:  $-40^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$   
Operating:  $-25^{\circ}\text{C}$  to  $+65^{\circ}\text{C}$

## OPTIONS SELECTION

Mode of Operation	Series	Input Voltage	Sensing Range	Adjustment
Current Sensor	HCS	3-50 VDC	<b>VARIABLE RANGES</b>	C = Factory fixed A = Variable, integral, potentiometer
			030 8A to 30A 045 9A to 45A 060 10A to 60A (others by request)	
			<b>FIXED RANGES</b>	
			Specify Actuate setting (example: 010 = 10amps)	

*Specifications subject to change without notice.*
